Setup Stitch MCP + Skills with Antigravity

1. Install Antigravity

Download and install Antigravity:

https://antigravity.google/

Install it based on your OS and open the application.

---

2. Create Stitch API Key

Go to:

https://stitch.withgoogle.com/settings

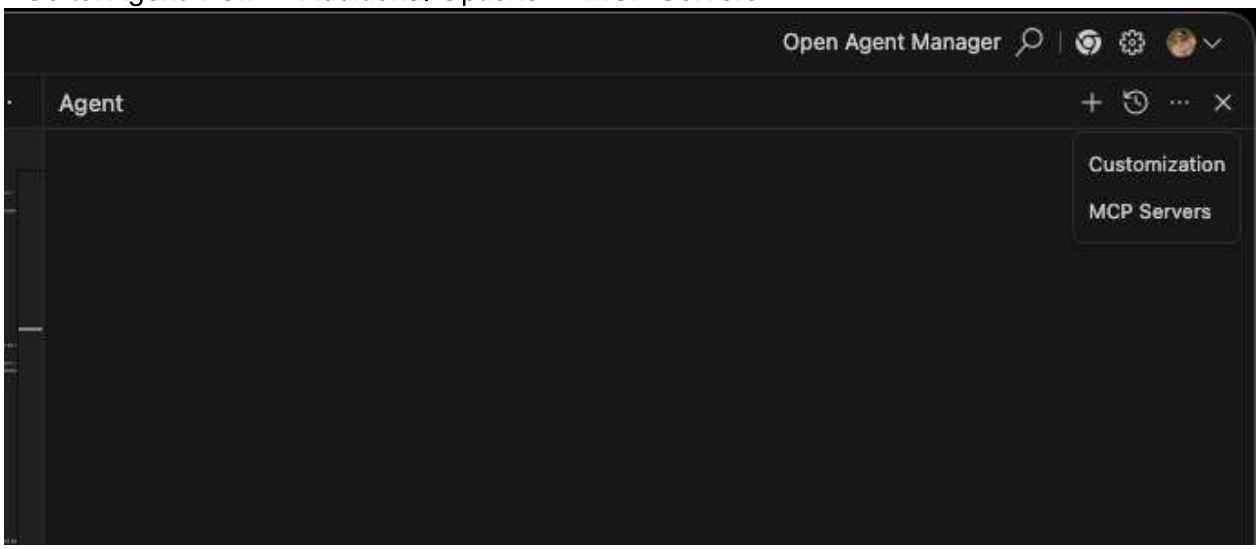
Steps:

- Sign in with your Google account
- Navigate to API settings
- Create a new API key
- Copy and save the key

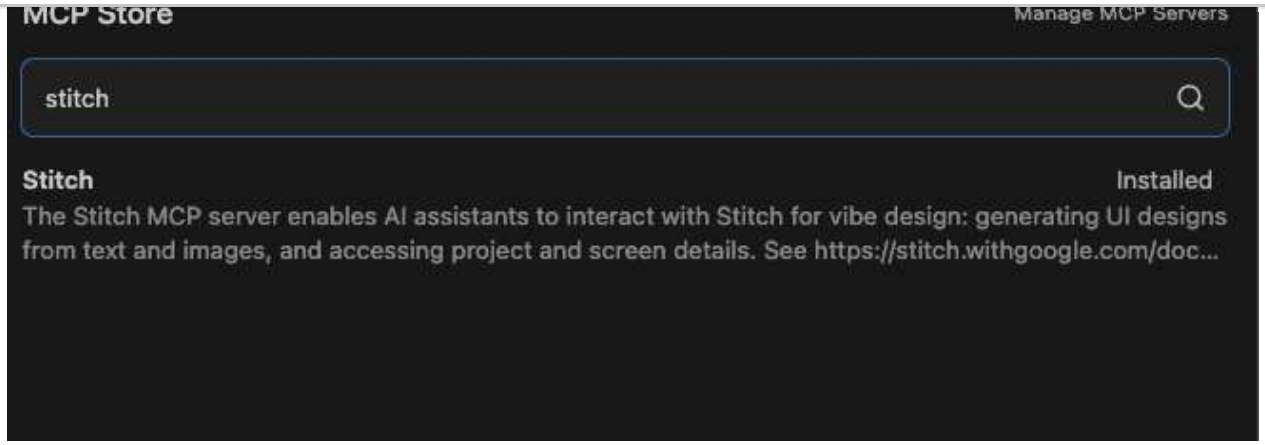
---

3. Install Stitch MCP in Antigravity

- Open Antigravity
- Go to: Agent View → Additional Options → MCP Servers



Setup Stitch MCP + Skills with Antigravity



- Select "Stitch MCP"
- Paste your API key from step 2
- Complete installation

---

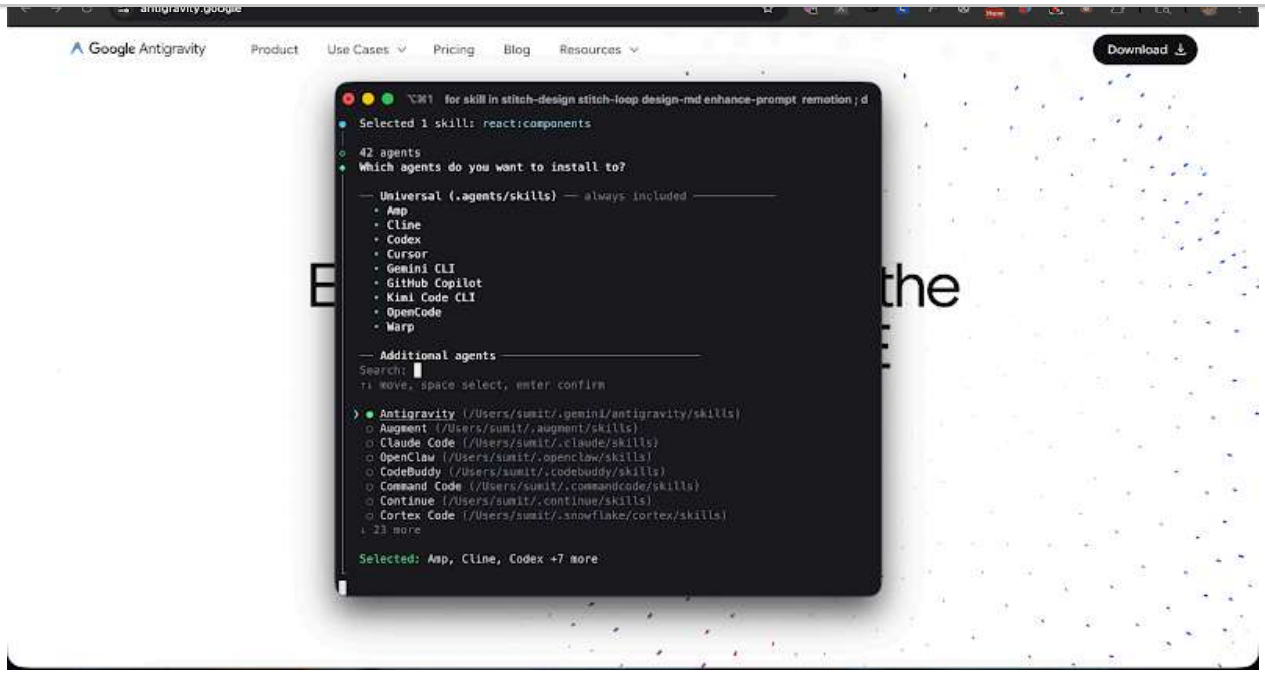
4. Install Stitch Skills

Run the following command in your terminal:

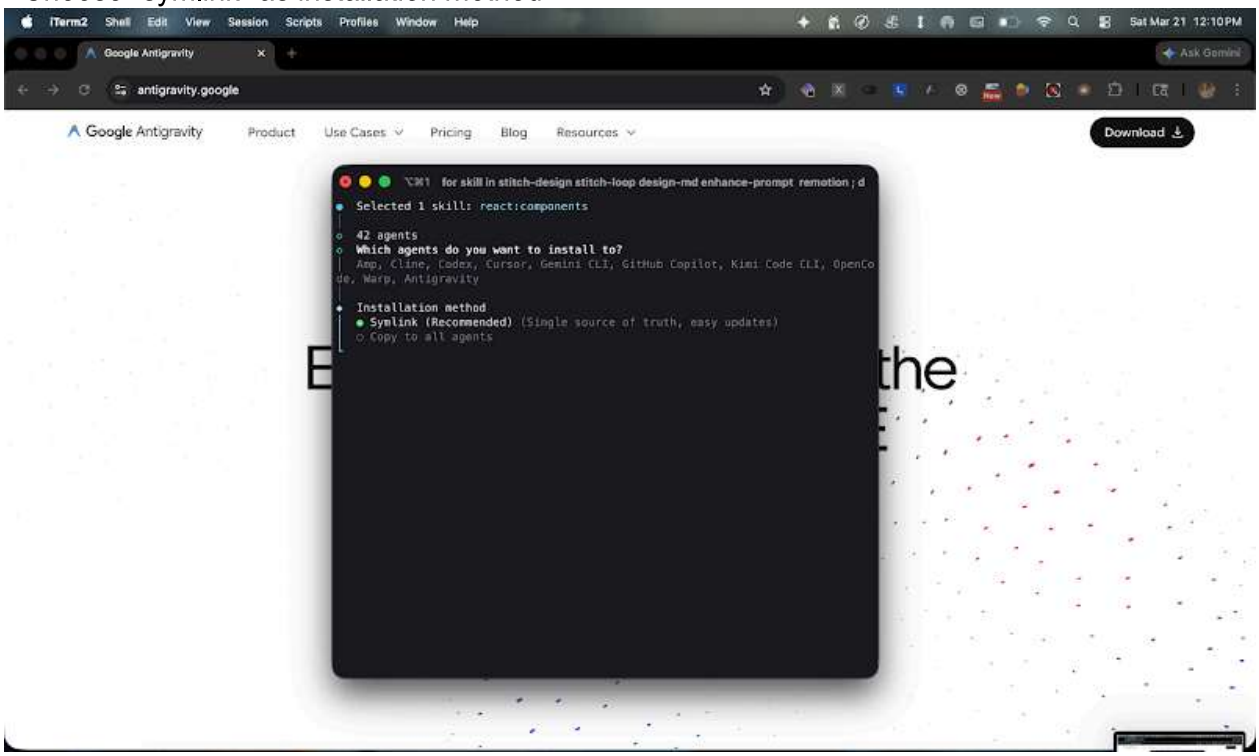
```
for skill in stitch-design stitch-loop design-md enhance-prompt react:components remotion shadcn-ui; do
  npx skills add google-labs-code/stitch-skills --skill $skill --global
done
```

During installation:

Setup Stitch MCP + Skills with Antigravity



- Choose "symlink" as installation method



5. Use Stitch in Your Project

Open your project in Antigravity and use this prefix in prompts:

Using Stitch MCP and Skill make a "YOUR PROMPT"

Example:

Setup Stitch MCP + Skills with Antigravity

Optional Notes

- Use more specific prompts for better results
- Combine with enhance-prompt skill for improved output
